# about the author

Kaloyan Krastev is a software developer since 2000 with more than twenty years of experience on linux platforms. He has designed applications with command-line, web and graphical user interfaces. The source code is in multiple object-oriented programming languages, mainly python and C++. His recent works are dedicated to embedded operating systems and corresponding applications. Learn more in his [CV](#).

He has learned to do precise measurements, experimental data analysis and online visualization during his education (a PhD in particle physics) and later in science and industry. In addition, he is an expert in open-source software. He has done a lot of technical writing and almost one hundred public presentations during his professional career in Bulgaria, Germany and France. Find a linked list to his recent projects in [Table 1](#).
