

# welcome to [kaloyansen](#) public repositories on github

Kaloyan Krastev\*

Wednesday 13<sup>th</sup> March, 2024 <sup>†</sup>

I am a software developer since 2000 with more than twenty years of experience on linux platforms. I have designed applications with a command-line, web and graphical user interface. The source code is in multiple object-oriented programming languages, mainly python and C++. My recent work is dedicated to embedded operating systems and corresponding applications.

I have learned to do precise measurements, experimental data analysis and online visualisation during my scientific education (PhD in particle physics) and later in science and industry. In addition, I am an expert in open-source software. I have done a lot of technical writing and public presentations during my career in Bulgaria, Germany and France.

Learn more about me [here](#).
